

**WOMEN'S COLLEGE, AGARTALA**

**INTERNAL QUALITY ASSURANCE CELL**

**Feedback Review Report (2017-18)**

The Internal Quality Assurance Cell, Women's College, Agartala has collected feedback from various stakeholders, namely, the students, the faculties and the guardians as a part of AQAR. The Cell has thoroughly reviewed the feedback analysis report that highlights our strength as well as shows our shortcomings in various strata. The feedback analysis reveals that students are contented with the quality of their teachers, explicitly, their effort to complete and cover the course, their subject knowledge, ability to bring conceptual clarity, promotion of thinking ability, communication skill, regularity, punctuality, providing confidence, ability of making the subject interesting and solving the queries. However, focus should be to improve the parameters of complementing theory with practical example thereby contributing to the all-round development of the students. Also, efforts should be made to interact or guide the students outside the class. The students are most satisfied with the adequacy of the safety measures in the college. Guardians are also very much contented with the activities of the teachers, but they expressed their apprehension about the existing infrastructural facilities. Initiatives need to be taken to improve library facility, accessibility of computer, internet in the college. The feedback analysis also emphasizes the need to keep the college campus clean and pollution free.
